

What can we do?

Option A

Build a new operational semantics

Option B

Build an axiomatic concurrency model

What can we do?

Option A

Build a new operational semantics

Option B

Build an axiomatic concurrency model

An Axiomatic Concurrency Model

```
when(x) {   
  x.balance += 10;  
  when(x) {  }  
}
```

Executions are tuples of $(\mathbb{E}, po, co)$
