

What is Behaviour-oriented Currency (BoC)?

```
def main(src: cown[Account], dst: cown[Account]) {  
    when(src, dst) {   
        if (!dst.frozen && !src.frozen && src.balance >= 10) {  
            src.balance -= 10; dst.balance += 10;  
        }  
    }  
}
```

Behaviors can require and access multiple contexts at once

if(!dst.frozen&&!src.frozen&&src.balanced==10){

```
def main(src: Account, dst: Account) {
```

src.balance -= 10; dst.balance += 10;

when(src, dst) {

A large teal circle with a white capital letter 'C' centered inside it.

C

ksarncree:1000

from zero to fairness
