

What can we do?

# Option A

---

Build a new operational semantics

## Option B

---

Build an axiomatic concurrency model

# What can we do?

---

Option A

---

Build a new operational semantics

Option B

---

Build an axiomatic concurrency model

# An Axiomatic Concurrency Model

---

```
when(x) {   
  x.balance += 10;  
  when(x) {  }  
}
```

Executions are tuples of  $(\mathbb{E}, po, co)$
